Ian Adams

Address:12785 Opalocka Dr. Chesterland, Ohio **Cell**:(419)496-3505 **email**:ita@case.edu

Education

Bachelor of Science in Biology, 2006
University of Mount Union, Alliance, Ohio

Research Experience

Case Western Reserve University, Mouse Behavioral Phenotyping Core **2020 - Present**
Manager

- Provide labor and analysis for full-service behavioral experiments
- Meet with labs to help design behavioral experiments relevant to their disease models
- Responsible for training users to perform and interpret mouse behavioral assays
- Responsible for regulatory compliance and equipment maintenance within the MBPC
- Assist in the scheduling and billing of experiments using iLab

Case Western Reserve University, Department of Neurosciences
Research Assistant IV/Lab Manager **2010 - 2020**

- Served as Lab Manager and Research Assistant for David Katz
- Responsible for lab compliance and interactions with multiple university-based and external regulatory bodies
- Served as laboratory safety officer
- Responsible for ordering supplies and laboratory equipment through initiating contact and entering into negotiations with outside vendors
- Responsible for carrying out respiratory, motor and cognitive behavior testing batteries on transgenic mice for Rett Syndrome research
- Responsible for creating detailed protocols, standard operating procedures and organizing data for presentation to funding sources and collaborators
- Responsible for developing accurate timelines and budgets for long-term studies to present to potential private industry collaborators

WIL Research, LLC, Ashland, Ohio
Biologist, Developmental and Reproductive Toxicology **2006-2010**

- Responsible for in-life data collection and execution of experimental protocols for developmental/reproductive teratology studies on several animal models (mouse, rat, and rabbit)

Certifications

Associate Laboratory Animal Technician (ALAT) from the American Association of Laboratory Animal Sciences (AALAS) (2009)

Publication Credits

"Restoration of motor learning in a mouse model of Rett syndrome following long-term treatment with a novel small-molecule activator of TrkB."

-Disease models & mechanisms. 2020 Nov 27;13(11): dmm044685

"A BDNF loop-domain mimetic acutely reverses spontaneous apneas and respiratory abnormalities during behavioral arousal in a mouse model of Rett syndrome."

-Disease models & mechanisms. 2014 Sep 7;(9): 1047-55.

"Brain activity mapping in Mecp2 mutant mice reveals functional deficits in forebrain circuits, including key nodes in the default mode network, that are reversed with ketamine treatment." -J Neurosci. 2012 Oct 3;32(40):13860-72.

"A TrkB small molecule partial agonist rescues TrkB phosphorylation deficits and improves respiratory function in a mouse model of Rett syndrome." -J Neurosci. 2012 Feb 1;32(5):1803-10.
